GAME PLAY

BLINDS

A small Blind and Big Blind are fixed amount for a table which are posted by two players to the left of Dealer (D) respectively before any cards are dealt on the table. These are mandatory bets. Two cards (called the hole cards) are then dealt to each player.

PRE-FLOP

A round of betting takes place based on the Player's cards where the bets can be called or raised by the players or the players can drop out (fold) from the game, starting from the player to the left of the Big Blind in clockwise direction. Each player has the following options:

Fold

Discard his 2-hole cards (the user will no longer be a part of this hand after this action and loses all rights to contend from amount accumulated in the pot).

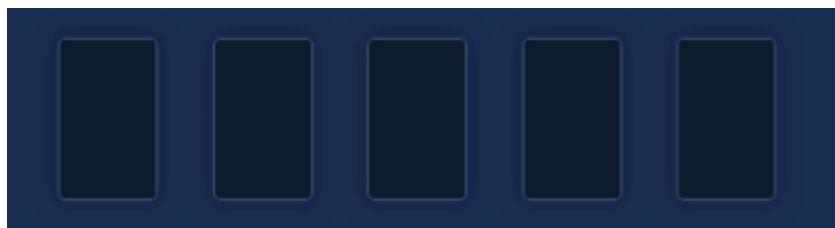

Call

Contribute an amount equivalent to the amount posted by the Big Blind.

Raise

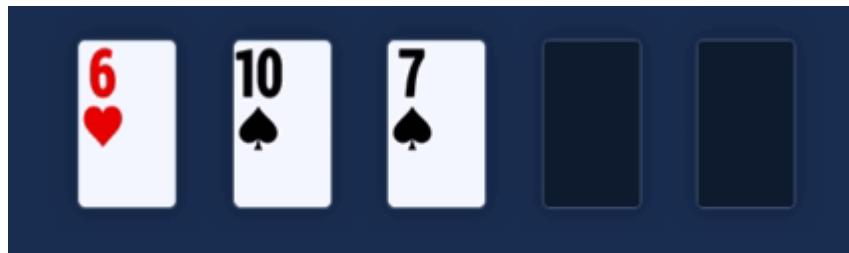

Contribute of amount greater than the big blind (Restriction apply to the minimum amount user has to put extra to raise). When a Player chooses to raise, all the remaining players in the hands are required to at least match the raised amount to continue to be a part of hand (Exception: when a user does not have enough amount to raise or to match the raised amount, he can put his entire table balance in the pot and go "All in").

This round of betting ends when all players who choose not to fold or go all-in, match the highest individual contribution to the pot of the player. (If player except one-fold, then the hand ends and all the money in the pot is awarded to the remaining player after any rake deductions that may apply). If 2 or more players remain in the hand after the end of this round, player move to Flop.

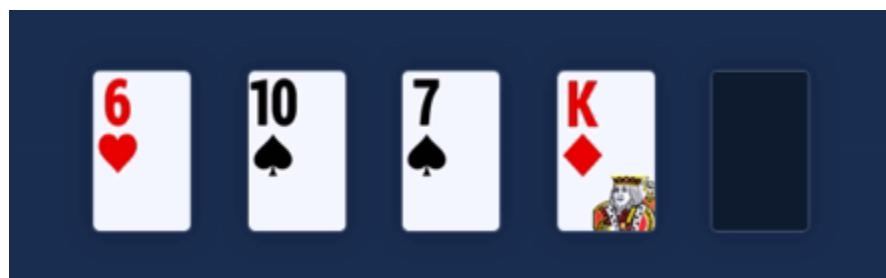

THE FLOP

Now, three cards are dealt face-up on the board. This is known as ‘the flop’. In Hold’em, the three cards on the flop are community cards, available to all players still in the hand. Betting on the flop begins with the active player immediately clockwise from the button. The betting options are similar to pre-flop, however if nobody has previously bet, players may opt to check, passing the action to the next active player clockwise.

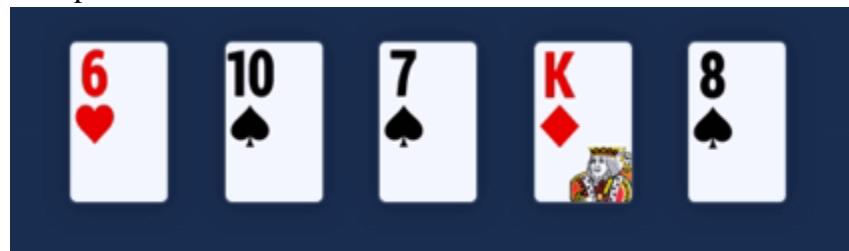

THE TURN

When the betting action is completed for the flop round, the ‘turn’ is dealt face-up on the board. The turn is the fourth community card in Hold’em (and is sometimes also called ‘Fourth Street’). Another round of betting ensues, beginning with the active player immediately clockwise from the button.

THE RIVER

When betting action is completed for the turn round, the ‘river’ or ‘Fifth Street’ is dealt face-up on the board. The river is the fifth and final community card in a Hold’em game. Betting again begins with the active player immediately clockwise from the button, and the same betting rules apply as they do for the flop and turn, as explained above.

THE SHOWDOWN

If there is more than one remaining player when the final betting round is complete, the last person to bet or raise shows their cards, unless there was no bet on the final round in which case the player immediately clockwise from the button shows their cards first. The player with the best five-card poker hand wins the pot. In the event of identical hands, the pot will be equally divided between the players with the best hands. Hold'em rules state that all suits are equal.

PL OMAHA

The minimum bet in Pot Limit Omaha is the same as the size of the big blind, but players can always bet up to the size of the pot.

Minimum raise: The raise amount must be at least as much as the previous bet or raise in the same round. As an example, if the first player to act bets ₹5 then the second player must raise a minimum of ₹5 (total bet of ₹10).

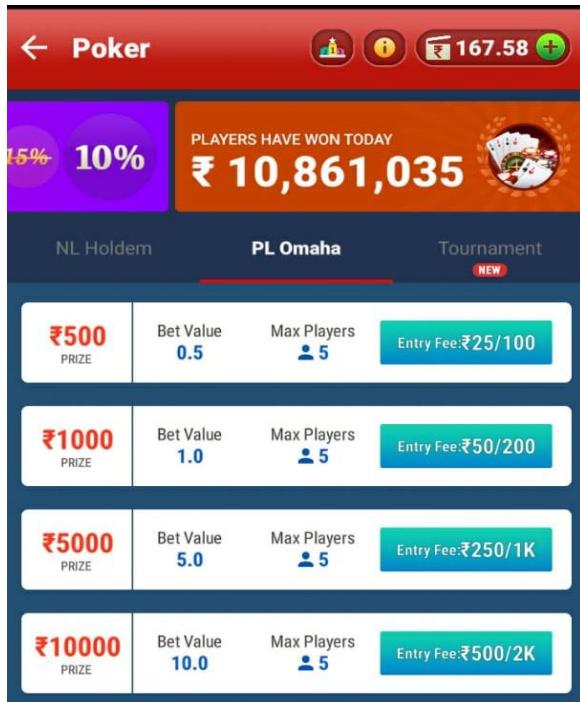

Maximum raise: The size of the pot, which is defined as the total of the active pot, plus all bets on the table, plus the amount the active player must first call before raising.

Example: If the size of the pot is ₹100, and there is no previous action on a particular betting round, a player may bet a maximum of ₹100. After that bet, the action moves to the next player clockwise. That player can either fold, call ₹100, or raise any amount between the minimum (₹100 more) and the maximum. The maximum bet in this case is ₹400 - the raiser would first call ₹100, bringing the pot size to ₹300, and then raise ₹300 more, making a total bet of ₹400.

In Pot Limit Omaha, there is no 'cap' on the number of raises allowed.

CONTEST TABLE

Entry fee (Rs.)	Bet value (Rs.)	Prize (Rs.)	Platform Fee
25/100	0.5	500	10%
50/200	1.0	1000	10%
250/1000	5.0	5000	10%
500/2000	10.0	10000	10%

GAME PLAY

BASIC STRATEGIES

In Pot Limit Omaha games, the games are referred to by the size of their blinds (for example, a ₹1/₹2 Omaha game has a small blind of ₹1 and a big blind of ₹2).

Betting then commences from the player to the left of the big blind.

In Fixed Limit Omaha games, the big blind is the same as the small bet, and the small blind is typically half of the size of the big blind but may be larger depending on the stakes.

For example, in a ₹2/₹4 Limit game the small blind is ₹1, and the big blind is ₹2.

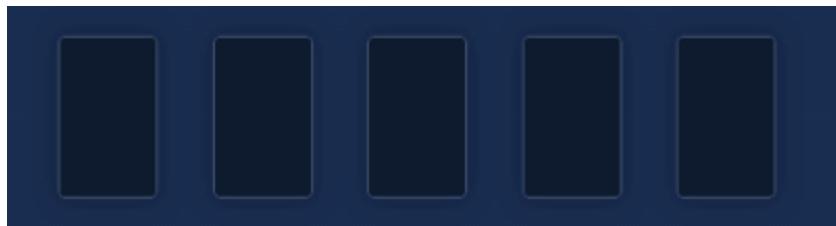

Now, each player is dealt their four-hole cards. Betting action proceeds clockwise around the table, starting with the player ‘under the gun’ (immediately clockwise from the big blind).

PRE-FLOP

After seeing his or her hole cards, each player now has the option to play his or her hand by calling or raising the big blind. The action begins to the left of the big blind, which is considered a ‘live’ bet on this round. That player has the option to fold, call or raise.

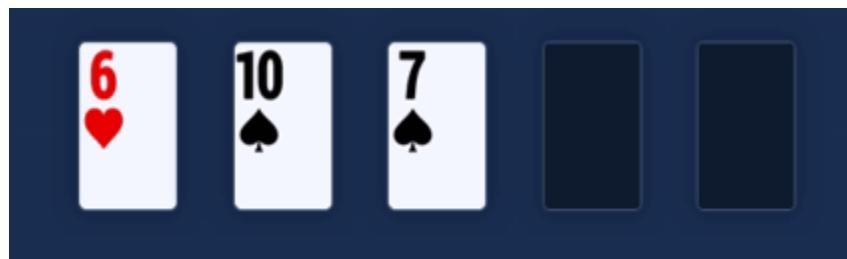

For example, if the big blind were ₹2, it would cost ₹2 to call, or at least ₹4 to raise. Action then proceeds clockwise around the table.

Betting continues on each betting round until all active players (who have not folded) have placed equal bets in the pot.

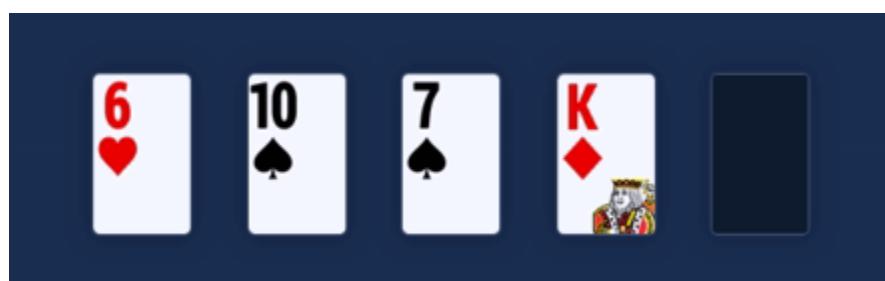

THE FLOP

After the first round of betting is complete, the ‘flop’ is dealt face-up on the board. The flop is the first three community cards available to all active players. Play begins with the active player immediately clockwise from the button. Another round of betting ensues. In Fixed Limit Omaha, all bets and raises occur in increments of the small bet (for example, ₹2 in a ₹2/₹4 game).

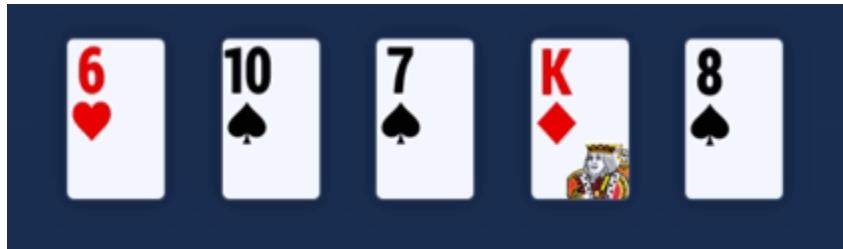

THE TURN

When betting action is completed for the flop round, the ‘turn’ is dealt face-up on the board. The turn is the fourth community card in an Omaha game. Play begins with the active player immediately clockwise from the button. Another round of betting ensues. In Fixed Limit Omaha, bets and raises on the turn are in increments of the big bet (for example, ₹4 in a ₹2/₹4 game).

THE RIVER

When betting action is completed for the turn round, the ‘river’ is dealt face-up on the board. The river is the fifth and final community card in Omaha poker. The final round of betting begins with the active player immediately clockwise from the button.

THE SHOWDOWN

If there is more than one remaining player when the final betting round is complete, the last person to bet or raise shows their cards, unless there was no bet on the final round in which case the player immediately clockwise from the button shows their cards first. The player with the best five-card hand wins the pot. Remember: in Omaha, players must use two and only two of their four-hole cards in combination with exactly three of the cards from the board. In the event of identical hands, the pot will be equally divided between the players with the best hands.

HOW PL OMAHA DIFFERS FROM NL HOLDEM

- 4-hole cards are dealt instead of 2 to each player.
- A player must always use cards from 4 cards to him/her and 3 cards from the 5 community cards to make best 5 cards.
- A limit is placed on the maximum amount that can be raised in the user's turn. A user may raise any amount less than or equal to pot value. (Calculated after assuming that the user called the pot)

HAND STRENGTH

1. Royal flush

A, K, Q, J, 10, all the same suit.

2. Straight flush

Five cards in a sequence, all in the same suit.

3. Four of a kind

All four cards of the same rank.

4. Full house

Three of a kind with a pair.

5. Flush

Any five cards of the same suit, but not in a sequence.

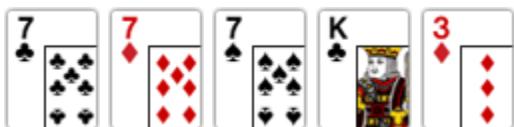

6. Straight

Five cards in a sequence, but not of the same suit.

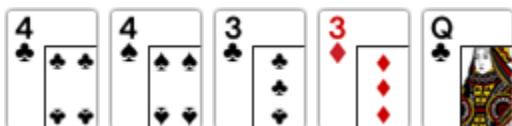

7. Three of a kind

Three cards of the same rank.

8. Two pair

Two different pairs.

9. Pair

Two cards of the same rank.

10. High Card

When you haven't made any of the hands above, the highest card plays.

In the example below, the jack plays as the highest card.

EXAMPLE OF A GAMEPLAY

In a table of entry fee of Rs.5/20 with bet value 0.2 minimum balance required in the wallet is Rs. 5.

BLINDS

Here the fixed bet amount of small blind is 0.2 and big blind is 0.4.

PRE-FLOP

The first round of betting takes place right after all hole cards have been dealt to each player. The first player to act is the player to the left of the big blind, and this player then has three options:

Call: match the amount of the big blind (0.4 on this table)

Raise: increase the bet within the specific limits of the game

Fold: throw one's hand away

If a player chooses to fold, he or she is no longer eligible to win the current hand.

A player can raise by any amount he wants up to the maximum that table balance allows, and betting all of your chips is deemed "all in" in this table minimum raise for this hand is 0.4 that means total bet will become 0.8 as $0.4+0.4$

The players who follow have the same three options: call, raise or fold. In the case of raising, the minimum allotted amount for a raise must be equal to the original raise amount.

FLOP

After the first preflop betting round has been completed, the second betting round takes place on the flop after the first three community cards have been dealt. In this betting round, and all that follow from now on, action starts with the first active player to the left of the dealer (D). Along with the options to bet, call, fold and raise, a player now has the option to check if no betting action has occurred prior. A check simply means to pass the action to the next player in the hand.

THE TURN

The fourth community card, called the turn, is dealt face-up following all betting action on the flop. Once this has been completed, another round of betting occurs, similar to that on the previous street of play. Again, players have the option to bet, call, fold, raise and check.

THE RIVER

The fifth community card, called the river, is dealt face-up following all betting action on the turn. Once this has been completed, another round of betting occurs, similar to that on the previous street of play. Again, players have the option to options to bet, call, fold, raise and check. After all betting action has been completed, the remaining players in the hand with hole cards now expose their holdings to determine a winner. This is called the showdown.

SHOWDOWN

The remaining players open their hole cards, and with the assistance of the dealer, a winning hand is determined. The player with the best combination of five cards will win the pot.

OBJECTIVE

The objective for each player in each game is to win the exact number or a number higher of the calls (bets) they called in the beginning. For example, if a player called 4 before the game started, then they

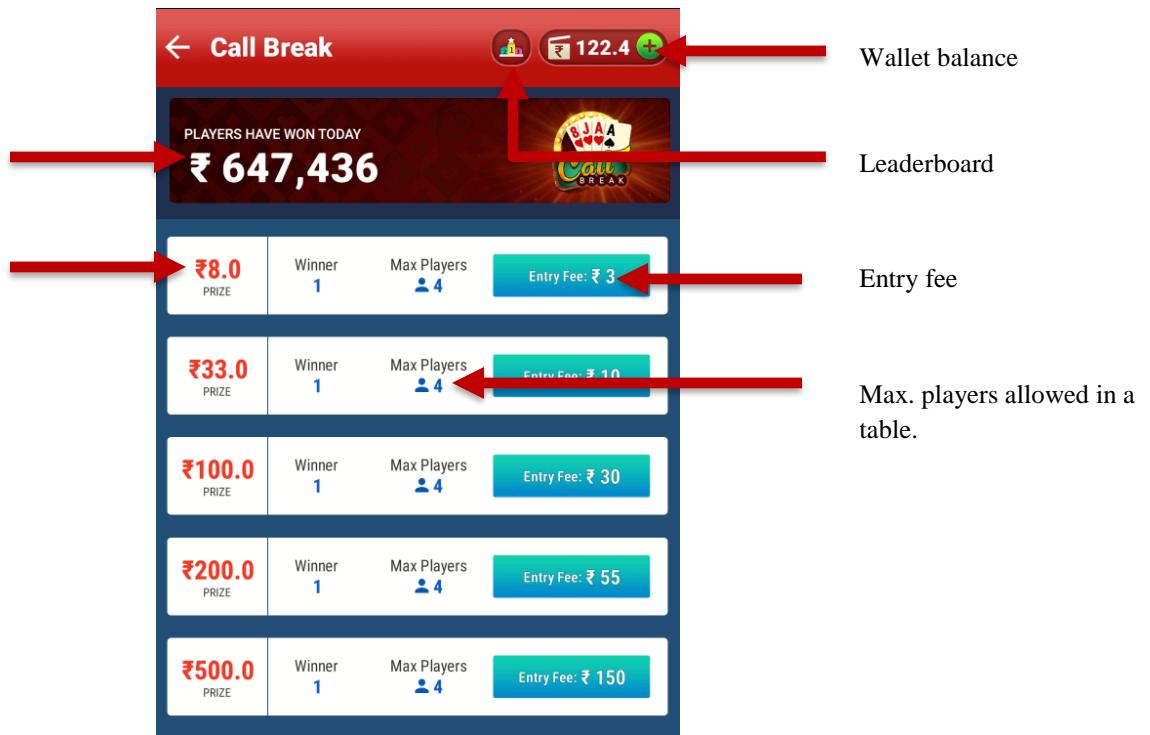

will have to win 4 or 5 calls/bets in the game to win 4 points (points equal to their call). If they get less than four or more than five bets/calls, then they will score -4. The game has 3 rounds.

Trump Suit: Spade is the trump suit in every game. This doesn't change in call break card games.

CONTESTS

Entry Fee (Rs.)	Total players	Winning Prize (Rs.)	Platform Fee
3	4	8	Rs.4
10	4	33	Rs.7
30	4	100	Rs.20
55	4	200	Rs.20
150	4	500	Rs.100

Note: There will be only one will and the only winner will get winning prize

GAME PLAY

THE CALL

Calling begins with the player sitting on the right side of the dealer and it continues anti-clockwise. Each player calls a number (minimum 1). This number corresponds to the number of bids/calls a player predicts to win in a game. Therefore, the maximum number that can be called is 13.

The player to the right of the dealer leads the first bet with any card of their choice. The players after that can top previous cards by throwing a higher card of the same suit (the suit of the lead card). If a player doesn't have a higher card of that suit, they can throw a smaller card, too. Alternatively, they can throw a trump card, i.e., any spade. A trump card of any value tops a card of any rank from any other suit.

For example, the first player played 10 of hearts and the second player played queen of hearts to trump it, but the third player played 3 of spades to top the cards before, as spade is the trump suit. A trump card

can be topped by another trump card of a higher value, e.g., a 3 of spades can be topped by 4 of spades or higher.

If a player doesn't have a lead suit card or a trump card, they can play any other card they wish, but they won't win the bet or trick with it.

The player who wins starts the next bet.

EVALUATION OF POINTS IN CALL BREAK

When all the cards in each player's hands are finished, that game is complete. Then the points of each player are evaluated depending upon the calls they made in the beginning of the game. Winning players get points equivalent to the calls they made. Losing players lose the number of points they called.

However, a player who calls 3 and gets 4 bits then the player gets +0.1 for every extra bits/calls he scores.

When a round or game is complete and its points are evaluated, the next game is started. There are 3 rounds, so the call break game continues till 3 rounds. When the game comes to end, the final scores of all the players from all the rounds are calculated to determine the winner.

OTHER CALL BREAK CARD GAME RULES

- A player who has a card from the same suit as the lead card is not obligated to play it.
- A player who has no card from the lead suit but has a trump card is not obligated to play the trump card.

Note:

- If any player leaves or gets disconnected, then random cards will be auto discarded until the player re-joins the game.
- If two players have the same score, then prize will get equally distributed between them.
- If three players leave the table, then the last active player will be the winner.
- Any fraudulent activity may result in the permanent ban of the player Big Cash Account.

OBJECTIVE

The main objective of Rummy is to organize the 13 cards that each player gets invalid sets and sequences. To win the classic rummy games, you will have to make a minimum of two sequences, of which one must be a pure sequence while the rest can be any valid sequence sets. Without a pure sequence, an online Rummy declaration is said to be invalid.

SEQUENCE

In Rummy, a sequence is formed if 3 or more consecutive cards of the same sequence are grouped together.

There are two types of sequence in online rummy:

- **Pure Sequence**
- **Impure Sequence**

Some important terminology and basic rules:

Pure Sequence: The grouping of 3 or more consecutive cards of the same suit without a joker.

Impure Sequence: These online Rummy sequences contain jokers.

First Life: The first pure sequence is called the First Life.

Second Life: The Second Life is a second pure sequence or the first impure sequence.

Note: Second life is not valid until the has First life.

SETS

Sets in Indian Rummy: Sets are a group of 3 or more cards with the same rank but different suits. Sets can contain Jokers.

Score: A player's score is the sum of the value of all the cards that are not part of a valid sequence or set. The objective is to reduce your score to 0 by forming valid sequences and sets.

Card	Value
King, Queen, Jack & Ace	10
Other cards in Deck	Value as per their rank
Joker	0

NOTE: Lower score is always better.

Grouping of Cards: Tap on GROUP button or drag the cards as per your requirement manually.

Adding Cards: Tap on ADD HERE in the group you want to add or drag the cards as per your requirement to the desired group.

Discard Cards: Tap on DISCARD BUTTON or drag the cards as per your requirement manually to the discard frame in the center of the table.

Declare the game: Make sure all the 13 cards are arranged properly in the sequence and sets with at least 1 pure sequence and at last select the unwanted card to DECLARE instead of DISCARD.

Tap on the DECLARE button or drag the card to the DECLARE frame.

Some Additional Rules

- If player fails to pick up a card either from the open or closed deck before their turns out, the turn will switch to the next player.
- If player pick up a card but fails to discard any before their turn timer runs out, the card they picked up is discarded automatically.

BIG Cash platform provides 3 different entry options in Pool Rummy.

DEAL RUMMY

ABOUT

Deal Rummy is different from its other variants. It is played among 2 to 5 players. The name itself describes the game as a fixed number of deals i.e., 2,3,4, or 6. Here each player in the game receives an equal number of scores at the start of every deal.

For example, in a game 2 deals the score of 160 and 3 deals the score of 240. Then the winner of the game is the player with the highest number of scores at the end of the game.

POINT CALCULATION IN DEAL RUMMY.

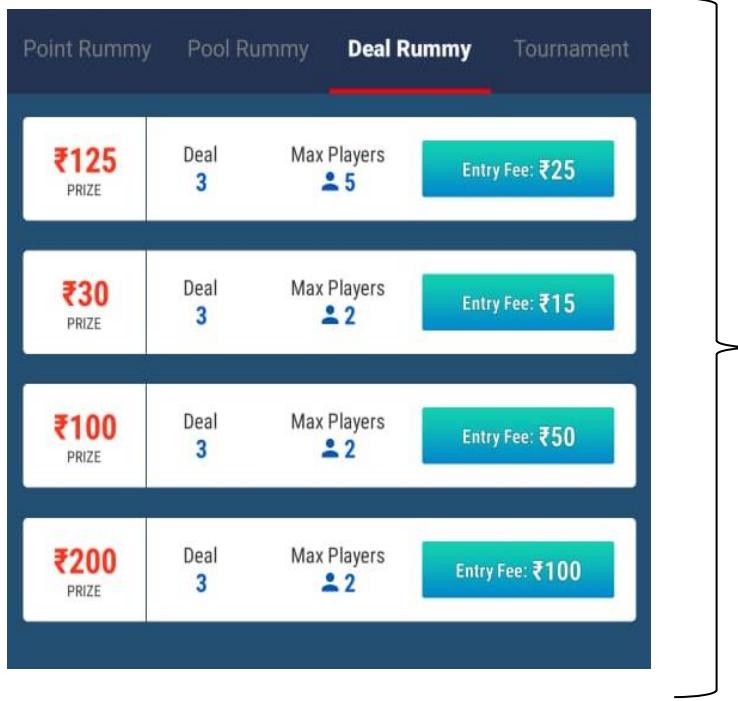

Winning = Total Points of the opponents

For example, if there are 5 players and if Player 1 declares and the other player loses 5,10, 15, 30 points.

Then the score of PLAYER 1 (Winner) = $5+10+15+30 = 60$ total.
